

143BIM

15th of March 2007

Table of content for publication

- 11443-
11450 Chen X.-D., Ducarme B., Sun H.-P.
[.doc](#)
[.pdf](#) Influence of the equilibrium ocean pole tide on the gravity field
- 11451-
11460 de Linage C., Hinderer J., Boy J.-P.
[.pdf](#) A search on the gravity/height ratio induced by surface loading: theoretical investigation and numerical applications
- 11461-
11462 Baker T. F., Fratrepietro F., Williams S. D. P., Van Camp M.
[.doc](#)
[.pdf](#) Gravity variations and displacement caused by storm surge loading on the north-west European shelf (*abstract*)
- 11463-
11464 Zürn W., Widmer-Schmid R.
[.doc](#)
[.pdf](#) σ_0 : gravity, strain and Earth radius (*abstract*)
- 11465-
11466 Rosat S., Watada S., Sato T.
[.doc](#)
[.pdf](#) Effects of the Earth asymmetry on σ_0 amplitude: predictions and observations after the 2004 Sumatra-Andaman earthquake (*abstract*)
- 11467-
11468 Florsch N., Llubes M., Petrov L., Boy J.-P., HINDERER J.
[.doc](#)
[.pdf](#) Combined gravimetric and VLBI free core nutation parameters, a Bayesian inversion (*abstract*)
- 11469-
11470 Kim J.-W., Neumeier J., Kim T., Woo I., Park H.-J.
[.doc](#)
[.pdf](#) First data analysis of MunGyung superconducting gravimeter in Korea (*abstract*)
- 11471- Ritschel B.

11471

[.doc](#) Integration of the GGP-ISDC in the new ISDC portal (*abstract*)

11473-
11488

Ducarme Bernard, Zhou Jiangcun, Sun Heping

[.doc](#)
[.pdf](#)

Evaluation of M4 ocean tide loading inside the GGP network

11489-
11497

Zhou Jiangcun, Sun Heping, Ducarme Bernard

[.doc](#)
[.pdf](#)

Validating the synthetic tidal gravity parameters with superconducting gravimeter observations

11499-
11506

Abdelbar El Wahabi, Michel van Ruymbeke, Bernard Ducarme

[.doc](#)
[.pdf](#)

Precursory signal of the last eruption of Mount Etna detected by continuous gravity observations

11507-
11517

Angel Venedikov, Bernard Ducarme

[.doc](#)

Localization and estimation of jumps, hidden frequencies and other perturbations in the Earth tide residues

11519-
11520

[.doc](#)

IN MEMORIAM Prof. Dr. Angel Petkov Venedikov Geophysical Institute and Central Laboratory on Geodesy, Bulgarian Academy of Science
