

THE MAGNETIC FIELD AND THE GEOLOGY
OF THE CANON CITY AREA

Victor Joseph Blum, S.J., A.B., A.M., M.S., S.T.L.

Dissertation Presented to the Faculty of the
Graduate School of Saint Louis University in
Partial Fulfillment of the Requirements for
the Degree of Doctor of Philosophy

1944

CONTENTS

CHAPTER I

INTRODUCTION	Page 1
------------------------	-----------

"Canon City area" geographically defined, 1. Interest of St. Louis University in Canon City geology, 2. Development of the present study, 2. Objectives, personnel, and equipment for the present problem, 3. Procedure in the investigation, 4. Historical review of previous work in the field of this study, 6.

CHAPTER II

THE GEOLOGICAL FORMATIONS OF THE

CANON CITY AREA	12
---------------------------	----

Purpose in discussing the geological formations, 12. Pre-Cambrian complex, 13. Stratigraphic outline of formations, 16. Manitou limestone, 19. Harding sandstone, 21. Age of the Harding, 21. Fremont limestone, 24. Colorosa Travertine, 26. Williams Canyon limestone, 26. The term "Millsap," 26. "Red Beds," 27. Examples of erosional non-conformity, 32. Morrison formation, 32. Garden Park and dinosaur fossils, 33. Age of the Morrison, 34. Purgatoire, and the Dakota problem, 35. Dakota formation, 38.

Interesting features in the
 Dakota, 45. Benton formation,
 50. Graneros shale, 50. Green-
 horn limestone, 51. Carlile
 shale, 53. Codell sandstone,
 53. Niobrara formation, 55.
 Timpas limestone, 55. Apishapa
 shale, 58. Pierre formation,
 60. Trinidad sandstone, 64.
 Vermejo formation, 65. Lara-
 mie restricted to Denver Basin,
 69. Tertiary, 70. Arapahoe, 71.
 Denver formation, 72. Ogallala
 and Nussbaum, 73. Quaternary, 77.

CHAPTER III

THE GEOLOGICAL STRUCTURES OF THE

CANON CITY AREA 79

Major structure of the Canon City
 area, 79. The fault south of Canon
 City, 80. Thrust faulting in Devil's
 Gap, 80. Horizontal fault in the
 Timpas north of Canon City, 82.
 Faults southwest of Canon City, 84.
 Formation hiatus on opposite sides
 of a fault, 85. Pre-Cambrian and
 sedimentary contact south of the
 Indian Burial Ground Monument, 88.
 Horizontal faulting in the Dakota,
 88. Faulting in the Timpas south of
 Canon City, 89. Structures south of
 Alkali Gap, 90.

CHAPTER IV

THE CONSTRUCTION, THEORY, AND USE OF

THE VERTICAL MAGNETIC FIELD

BALANCE 91

Essential nature of the magnetic

balance, 91. Parts of the magnetic balance, 91. Adjustments on the balance, 93. Theory of the vertical magnetometer, 94. Using the balance, 99.

CHAPTER V

THE PROPERTIES PECULIAR TO THE

MAGNETIC BALANCE USED IN THE

PRESENT SURVEY 103

Sensitivity determination, 103.
Sensitivity of the instrument used,
107. Temperature coefficient, 107.
Asymmetry in "W" and "E" readings,
109.

CHAPTER VI

ACTUAL FIELD PROCEDURE IN THE

MAGNETIC AND GEOLOGICAL

SURVEY 111

Area actually surveyed, 111. Distribution of magnetic stations, 112. Geographical location of magnetic stations, 112. Geological surveying, 113. Controls employed in the survey, 116. Magnetic declination, 117.

CHAPTER VII

THE MAGNETIC SURVEY DATA 119

Kind of magnetometer readings,
119. Temperature correction,
119. Latitude correction, 120.

Magnetometer survey data, 125.

CHAPTER VIII

THE GEOLOGICAL, MAGNETIC, AND

TOPOGRAPHIC MAPS 152

Construction of the geological map, 152. The topographic map, 154. Magnetic map, 155. The magnetic low south of Canon City, 155. Magnetic highs northwest of Canon City, 157. Magnetic field and the basement complex, 158. Magnetic low southwest of Chandler, 161. Terrain effect on the magnetic field, 162.

CHAPTER IX

CONCLUSION 168

Importance of Canon City geology, 168. Place of geophysics in the Canon City area, 170. Acknowledgments, 171.

* * *

APPENDIX 173

List of references, 173. Bibliography, 180. Vita auctoris, 186.
