

A DETAILED MAGNETOMETER SURVEY OF THE MISSOURI FLOOD
PLAIN REGION IMMEDIATELY SOUTHEAST OF SAINT
CHARLES MISSOURI IN SAINT LOUIS COUNTY

MADE IN PARTIAL

COMPLETION OF

MY DEGREE

IN THE FIELD OF

APPLIED PHYSICS

AT THE

UNIVERSITY OF MISSOURI

COLLEGE OF MINES

DEPARTMENT OF PHYSICAL GEOGRAPHY

UNDER THE SUPERVISION OF

DR. R. E. HEDGES

ASSISTANT PROFESSOR

Thesis Presented to the Faculty of the Graduate School
of Saint Louis University in Partial Fulfillment
of the Requirements for the Degree
Master of Science

Review of Geology 1950

TABLE OF CONTENTS

	Page
LIST OF FIGURES.....	iii
LIST OF PLATES.....	127
LIST OF TABLES.....	iv
Chapter	
I. INTRODUCTION	1
Area Selected	
Causes of Anomalies in Gravity	
Surface Features as a Criterion	
II. GEOLOGY OF THE AREA	8
Physiography	
Narrow valleys	
Missouri River trough	
Uplands	
Stratigraphy	
Quaternary and recent deposits	
Structure	
Igneous Geology	
Granites	
Felsites	
Basic rocks	
III. MAGNETIC INTERPRETATION THEORY AND REVIEW OF GEOPHYSICAL LITERATURE	44
Basic Definitions and Terms	
Basic Interpretation Mathematics	
Method of Magnetic Interpretation	
Empirical Analysis	
Theoretical Analysis	
Review of Geophysical Literature	

TABLE OF CONTENTS--Continued

Chapter	Page
IV. INSTRUMENTS AND SURVEYS	73
Transit Survey	
Magnetic Instruments	
Sensitivity Determinations	
Magnetometer Corrections	
Temperature	
Diurnal	
Auxiliary Magnets	
Base corrections	
Latitude and longitude corrections	
Vertical intensity correction	
Establishment of Secondary Bases	
Map Values	
V. INTERPRETATION OF OBSERVED MAGNETIC DATA AND FINAL CONCLUSIONS	86
Discussion of the Magnetic Maps	
Establishment of Base Values	
Causes of Anomalies in General	
Surface Sediments as a Cause of the St. Charles Anomaly	
Sedimentary Rocks as a Possible Cause	
Depth Determination	
Susceptibility Determination	
Basement Surface Features as a Cause	
Basement Polarized Zone as a Cause	
APPENDIX	110
BIBLIOGRAPHY	118
